

INDUSTRIAL ELECTRICIANS AND ENGINEERS

FOR THE MANUFACTURING, PRODUCTION AND ENERGY SECTORS

**SAFETY IS
NUMBER
ONE**

OUR MISSION

Athenry **delivers** specialised electrical design and services for the manufacturing, production and energy industries

OUR PHILOSOPHY

We believe in doing what we say we are going to do and that means we guarantee a professional service on time, **Safely** and without defect.

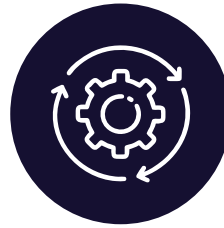

OUR SERVICES

Industrial Electrical

We have a team of experts who have the knowledge to maintain and optimise your electrical systems

Automation

We're experts in industrial automation and control systems integration. Our team of experienced engineers can help you for all your automation needs.

EV Charging

We specialise in installing EV charging stations for Commercial Properties, Government and Public Sectors and Fleet Operators

Machine Safety

We offer comprehensive machine safety solutions to create a secure working environment for your team.

Hazardous Area

By adhering to strict requirements, the electrical systems we design for hazardous areas can ensure maximum safety and compliance.

Other Services

Thermal imaging, fixed wire gas detection, IQP certification, appliances testing & tagging and AutoCAD

TESTIMONIALS

"Great company to deal with. 24/7 service and they go above and beyond to get you up and running again. Highly recommended."

Cameron Flavell, Quarry Supervisor – Winstone Aggregates Ltd

"I have found their Health & Safety processes second to none, enabling Taylors and Athenry Electrical to work collaboratively to eliminate or mitigate any risks. I would highly recommend Athenry Electrical to any organisation who requires reliability, expertise and safety, for any industrial electrical" services.

Rod Gardner, Projects and Compliance Manager – Taylors Laundry

"Athenry Electrical have been an excellent service provider to us for more than a decade. Their quality of work for both engineering services and installation have always been top notch and its clear they pride themselves in doing every job right. As soon as you find a service provider that knows what they're doing and can communicate properly makes my job easier and Athenry have certainly provided that."

Phillip Hogg, Mechatronics Engineer – TransNet NZ Limited

"I have been involved with Athenry Electrical for over 20 years on a variety of projects. The team has provided outstanding service in both their design and manufacturing of the Control Systems. Athenry has always met my expectations in a professional and timely manner, and I have no hesitation in recommending them for your next project no matter what the scale is and we will continue to use them for our up and coming projects in the future."

Bryce Coulter, Mechanical Design Engineer – Coulter Engineering Services Ltd

WE CHOOSE SAFETY

Competence will only be tested when something goes wrong. Customers of electrical contractors have a duty to ensure the safety of their own employees. That responsibility also extends to the employees of the contractor employed.

Registration or licensing as an electrical worker does not mean that an individual is competent to work in all fields of electrical work. At Athenry Electrical, we have developed the processes, procedures, practices and documentation to demonstrate our commitment to continuous improvement in Health and Safety. We have completed the PREQUAL Contractor assessment process and obtained a 5 stars rating.

You can rest assured that any possible liability will be mitigated by employing one or more of our competent staff.

**SAFETY IS
NUMBER
ONE**

SAFETY IS NUMBER ONE

We choose Safety

We have a comprehensive Health & Safety Management system which ensures all our staff and contractor employees are competent and compliant under the Health and Safety Act. You can be confident that when a risk management occurs, our processes and procedures are firmly in place to cope with any situation.

Trust & flexibility

Industrial Electricians who believe in doing what we say we are going to do – and that means we guarantee a professional service, on time, SAFELY and without defect.

We offer:

- 24/7 support through our on-call roster system
- Maintenance Shift Work cover or support
- Working in with production time frames
- Planned Shutdown maintenance and project support

Quality assurance

We have been delivering specialised electrical design and services for over 25 years. We have a leadership team bringing a wealth of industrial electrical experience, particularly with in the Manufacturing, Production and Energy Industries. Our ongoing training programmes have built a professional team dedicated to compliance and competence to ensure the successful outcome of every project, large or small. Mitigating the customer's risk.

Consistency, Knowledge,
Flexibility, Compliance and
Safety are the core values
that define our company
and enable us to deliver
a professional service, on
time, SAFELY and without
defect. It's what we call
"Fulfilling the promise"

STAFF TRAINING

On-going training programmes have built a professional team dedicated to the successful outcome of every project, large or small. Our leadership team have a wealth of industrial electrical experience and all staff are trained to minimum standards while competency is maintained through our Health and Safety Management system.

- **Electrical Trainee Registration – (Apprentices)**
- **Electrical Registrations**
- **Current Practicing Licences**
- **Basic CPR and First Aid**
- **Hazard I.D**
- **Permit Receiving**
- **Safe Working at Height**
- **Confined Space Entry**
- **Elevated Working Platforms certification**

KEY COMPETENCIES

- **Levels 4, 5 & 6 electrical, electronic and instrumentation**
- **System Integrator Competence** with Allen-Bradley and other recognised plc brands
- **Process Instrumentation**
- **Electrical Inspectors**
- **National Certificate in Electrical Apparatus in Explosive Atmospheres** includes the optional strand for electrical inspections
- **Hazardous Area Classification & Design**
- **Machine safety CMSE®** Certified Machinery Safety Expert (TÜV Nord)
- **Thermal imaging** level 1 certified thermographers
- **AutoCAD**
- **IQP (Independent Qualified Person)** certified for emergency lighting systems

OUR CLIENTS

OUR PROCESS

Assess

By conducting a thorough initial assessment, in consultation with the customer, the design process can proceed with a clear understanding of the project's requirements and constraints, leading to a safe, efficient and compliant electrical installation.

Design

Our engineers design your tailored electrical installation, ensuring it aligns with safety regulations and all relevant codes. The design is reviewed for safety and efficiency, and necessary approvals from the customer are obtained before proceeding with the installation.

Install

Our skilled electricians bring your electrical design to life with safe, reliable and compliant installations. We conduct thorough testing, inspections and final commissioning to meet all standards and ensure operational readiness.

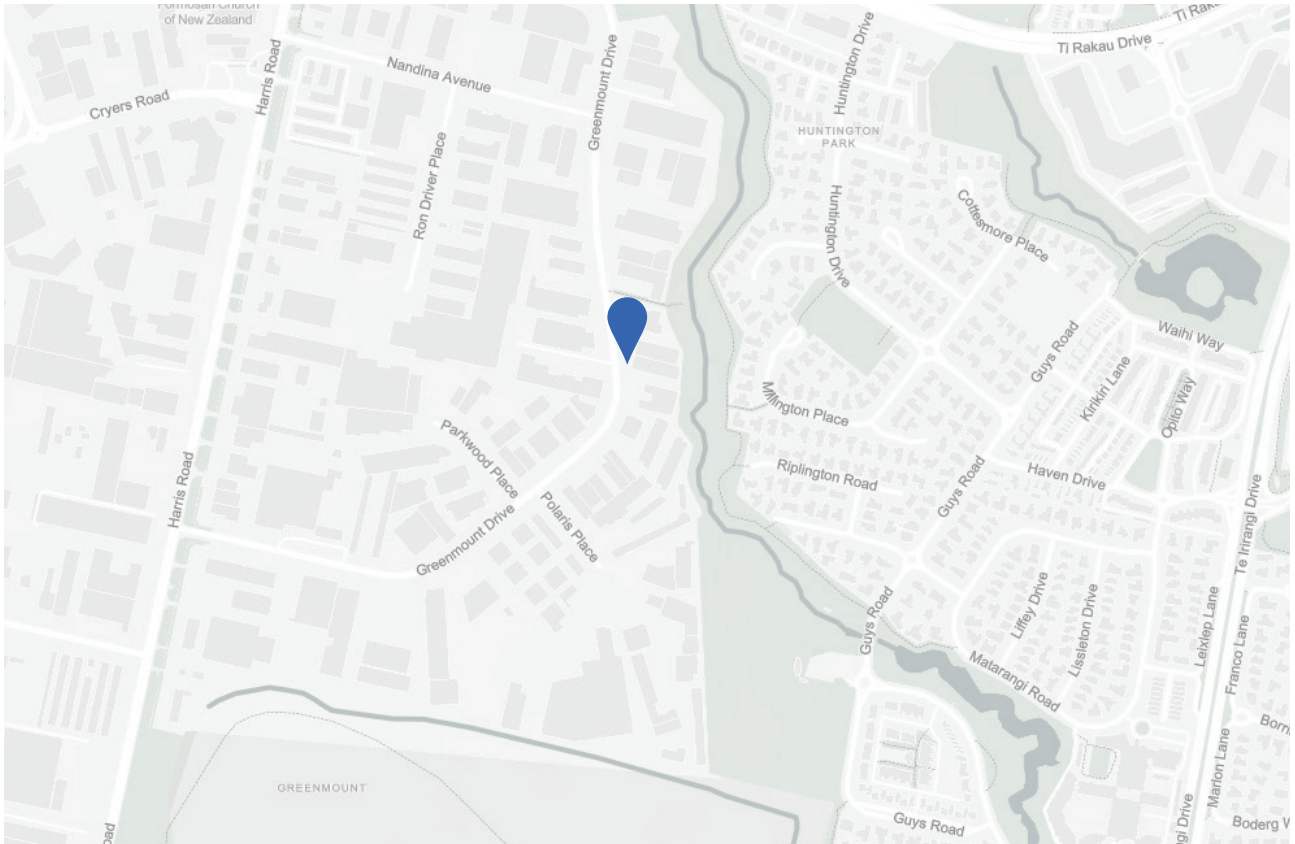

Maintain

Our 24/7 maintenance and call out services enhance the safety and efficiency of your electrical installations. Our services include routine inspections, preventive maintenance and corrective actions to prevent failures, reduce operational costs and minimize downtime.
